DECORATIVE Striping

Our premium-grade TFX professional striping system was developed exclusively for use in the automotive market. A special adhesive was developed specifically to make it possible to reposition the tape without breaking it or leaving adhesive residue. It immediately gained popularity and recognition among professional restylers and now stands alone in the marketplace as the benchmark for all other brands. A full color spectrum is available in both opaques and metallics. We also offer many other materials and specialty films available in a variety of other forms, such as **Shimmer Metallic**, **Ultra Metallic**, **Radiance**, **Black Non-Skid**, **Black Out**, **Luster**, **Polyester Film**, and **Premium Reflective**, as well as a surface protection film called **Uni-Gard®**. Below is a printed representation of these colors and materials. Printed colors are a simulation of the actual vinyl color. For an accurate TFX vinyl color match, refer to our Striping Systems Color Chart.
